

Detailed Action

The Examiner has stated that the non-elected claims must be cancelled since Claim 7 does not have the pixel circuit comprising at least two transistors in which one transistor is used for resetting the body of another transistor as defined in Claim 1.

Claims 7-15 have been cancelled.

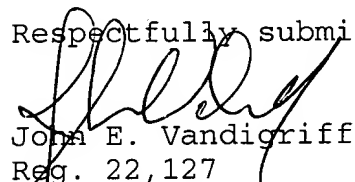

The abstract was objected to for using phrases which can be implied, such as "The present invention describes".

The Abstract has been amended removing the quoted phrase.

Summary

Since Claims 7-15 have been cancelled, and the Abstract has been amended, it is respectfully requested that elected Claims 1-6 be passed to issue.

Respectfully submitted,

John E. Vandigriff
